Part 2 READ AND KEEP THIS PART

1 Objective

The City requires a reliable, safe and compliant supply of chlorine tablets to support uninterrupted wastewater treatment operations across nominated City facilities.

2 Required goods

Requirement	Minimum requirement
Chemical	Trichloroisocyanuric acid (TCICA) chlorine tablets.
Tablet size	Nominal 200 g per tablet.
Pack size	25 kg container.
Form	Uniform, intact tablets suitable for the City's existing dosing/application arrangements.
Quality	Consistent commercial quality, free from contamination and excessive breakage or powder.
Labelling	Product name, batch/lot, net mass, hazard information, manufacturer/supplier details and expiry or manufacture date where applicable.
Documentation	Current Australian-compliant Safety Data Sheet and product technical data sheet supplied with the tender and kept current during the contract.
Shelf life	Tenderer to state shelf life and guarantee adequate remaining shelf life at delivery.
Substitutions	No substitution without prior written City approval.

3 Estimated Quantities and Ordering

The contract is a schedule-of-rates arrangement. Quantities are not guaranteed. Orders will be placed as required and may vary with operational demand, storage constraints, treatment conditions and budget availability. Tenderers must state minimum order quantities, pallet configuration and any volume price breaks.

4 Delivery Requirements

- Delivery within 14 calendar days after receipt of a valid City purchase order, unless a shorter period is offered and accepted.
- Deliver to a nominated City facility within the City of Kalgoorlie-Boulder, as specified on each purchase order.
- Coordinate delivery with the nominated City representative and comply with site access and safety directions.
- Use vehicles, packaging and handling methods suitable for dangerous goods and the product's hazard classification.
- Provide delivery documentation identifying the purchase order, product, quantity, batch/lot and delivery date.
- Remove or replace damaged, contaminated, leaking, incorrectly supplied or non-conforming goods at the supplier's cost.

5 Packaging and Storage Compatibility

Containers must be robust, moisture-resistant, securely sealed, stackable where intended, and suitable for transport and storage in Kalgoorlie-Boulder conditions. Packaging must preserve product integrity and comply with all applicable dangerous-goods, transport, labelling and workplace safety requirements.

6 Safety, Regulatory and Environmental Obligations

- Comply with all applicable Commonwealth and Western Australian laws, codes and standards relating to manufacture, supply, transport, handling and labelling.
- Maintain all licences, permits, registrations and competencies required to perform the contract.
- Immediately notify the City of product recalls, safety alerts, regulatory action or material changes to the product or SDS.
- Provide spill, emergency and safe-handling information and cooperate with incident investigations.
- Describe packaging recovery, recycling or waste-minimisation options available to the City.

7 Service and Account Management

- Nominate a contract manager and an operational ordering contact.
- Provide prompt order acknowledgement and expected delivery date.

- Advise supply constraints immediately and propose an approved continuity solution.
- Maintain traceability of batches supplied to the City.
- Participate in performance reviews when requested.

8 Performance Indicators

Indicator	Target / measure
On-time delivery	Delivery within the accepted lead time for at least 95% of orders.
Order accuracy	100% correct product and quantity, subject to agreed tolerances.
Product conformity	No substantiated non-conforming product deliveries.
Documentation	Current SDS and accurate delivery records maintained.
Issue response	Acknowledge urgent operational issues within 4 business hours.
